About Me

I am Daniel Christoper Bramastyo (24), a Bachelor of Information Systems graduate from Universitas Jambi. Currently, I am seeking job opportunities. During college, I was actively involved in student organizations at Universitas Jambi, including serving in the management of the Information Systems Student Association.
I developed a strong foundation in programming and data analysis. My involvement in the association helped me sharpen my teamwork skills.
I am passionate about using technology to solve problems, and I am eager to continuously learn and innovate to improve my skills.

Education

Bachelor of Information Systems   **Jul 2019 - Jul 2024**

Non-Formal Education

Fresh Graduate Academy | Big Data Using Python   **Jul 2024 - Sep 2024**
Digital Talent Scholarship
This Fresh Graduate Academy training is part of the Digital Talent Scholarship (DTS) in collaboration with Kominfo RI and UNJA. Available for final year students and unemployed alumni.
This training includes python programming and data analysis using learning media from Cisco Skillforall, as well as independent learning by working on question modules, final assignments and final exams.

Cloud Computing   **Feb 2022 - Jul 2022**
Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka
Bangkit Academy is an intensive technology training program initiated by Google, in collaboration with GoTo (Gojek & Tokopedia), and Traveloka, designed to equip Indonesian students with technology skills and soft skills

needed for the world of work, especially in the digital and technology fields. The program aims to help create work-ready digital talents who are competent, innovative, and able to compete globally, with a focus on developing skills needed in the technology industry.

The learning path followed is Cloud Computing, which consists of individual learning and final project in the form of a team. Individual learning includes asynchronous classes through online learning platforms such as Dicoding Academy, Coursera, and Google Cloud Skills Boost. In addition, each participant has a mentor to consult in case of non-academic difficulties.

The program also prepares participants to take Google's global Associate Cloud Engineer certification exam upon completion of all Certified Independent Study materials.

Fresh Graduate Academy | Database Design and Programming with SQL   **Jul 2021 - Sep 2021**

Digital Talent Scholarship

This Fresh Graduate Academy training is part of the Digital Talent Scholarship (DTS) in collaboration with Kominfo RI and UNJA. Available for final year students and unemployed alumni.

The training covers the database design process that involves organizing data according to the database model using learning media from Oracle Academy, as well as self-learning by working on question modules, final assignments and final exams.
